Certified Salesforce Administrator, Service Cloud Consultant, and Platform App Builder with extensive experience designing scalable Salesforce solutions. Recognized within the Salesforce ecosystem through appearances on Salesforce's Automate This YouTube series, the Salesforce Admins Podcast, and Dreamforce, with a strong reputation for building thoughtful automation strategies that improve efficiency, data quality, and user adoption.

As a Serviceblazer Community Group Co-Leader and active contributor to the Salesforce community, I regularly engage with admins, product teams, and business stakeholders to share best practices, provide feedback on emerging Service Cloud capabilities, and champion solutions that align technology with real business needs.

WORK EXPERIENCE

Salesforce Administrator (June 2025 - June 2026)

Waste Solution Services | Deerfield Beach, FL (Hybrid)

As the Salesforce Administrator I played a key role in designing, configuring, and scaling Salesforce as the company transitioned from legacy tools such as Pipedrive and Airtable into a more structured Salesforce-driven operating model. I supported sales, proposal operations, and service-related processes by building data models, automations, integrations, and user experiences that improved visibility, reduced manual work, and helped the business establish Salesforce as a central source of truth.

Supported System Integrations: Helped configure and support integrations and connected tools including Google Drive, Airtable, ZoomInfo, RingCentral, Slack, Einstein Activity Capture, and Salesforce Files to improve collaboration, documentation, communication, and sales operations.

Designed Scalable Salesforce Architecture: Built and refined a custom Salesforce data model to support complex waste management proposal operations, including Accounts, Properties, Opportunities, Proposal Work Items, Previous Accounts, Property Previous Accounts, Previous Invoices, Previous Line Items, and Confirmation Work Items.

Automated Invoice Parsing and Record Creation: Developed and supported automation that converted uploaded customer invoices into structured Salesforce records using Flow, Apex, Agentforce-style parsing logic, and JSON-based record creation patterns, significantly reducing the need for manual data entry.

Enhanced User Productivity: Created custom Lightning Web Components and Salesforce screen flows to guide proposal associates through invoice review, service confirmation, and queue-based work processes, improving usability and reducing confusion for users working through complex operational tasks.

Established Release and Change Management Practices: Supported Salesforce governance through structured development practices, user stories, testing, UAT, Jira tracking, and DevOps Center-based deployment processes across development, testing, and production environments.

Salesforce Administrator (May 2022 - March 2024) **Norwegian Cruise Line Holdings Ltd. | Miami, FL (Hybrid)**

As a Salesforce Administrator, I played a pivotal role in optimizing Salesforce for the Global Guest Relations, Casino, and Inbound Sales/Service departments, significantly enhancing operational efficiency and helping the company get the most out of its Salesforce investment.

Enhanced System Security: Identified and resolved a critical security breach, preventing potential data breaches and maintaining system integrity.

Improved User Adoption: Led a cross-functional collaboration to boost Salesforce utilization from 20% to 92%, implementing targeted training and customizations, often guided by clearly defined user stories.

Streamlined Operations: Automated account creation processes, reducing time and improving efficiency. Redesigned the Salesforce user interface for enhanced user experience and brand consistency.

Optimized Workflow Efficiency: Implemented Salesforce workflows and approval processes to streamline operations and reduce manual tasks, resulting in a 12% increase in productivity.

Enhanced Data Insights: Developed custom reports and dashboards to provide actionable insights to key stakeholders, allowing them to use their data to make decisions in ways they had not before considered.

Championed Salesforce Innovation: Proactively stayed updated on Salesforce releases and led team training sessions to foster a culture of continuous improvement. Communicated upcoming changes to department leads and conducted workshops to educate users on best practices, aligning with user stories to maximize the value of Salesforce. Collaborated with the QA team to ensure high-quality outcomes in all implementations.

PROJECTS, PUBLICATIONS, AND SPEAKING ENGAGEMENTS

Salesforce Admins Podcast - Featured Guest (October 2025)

Appeared as a featured guest on the Salesforce Admins Podcast, sharing insights from my Salesforce career journey, community involvement, and practical experience building admin-friendly automation solutions. Discussed the value of continuous learning, community engagement, and using Salesforce automation to solve real business problems.

Dreamforce - Admin Theatre Speaker (October 2025)

Presented "Building Salesforce Projects to Land Your Next Role" in the Salesforce Admin Theatre at Dreamforce. Shared practical strategies for creating portfolio-ready Salesforce projects that demonstrate real-world admin, automation, data modeling, and problem-solving skills.

CCI Training Center - Zoho CRM Implementation (June 2024 - July 2024)

As the solo CRM admin, I aided in the migration of the company's CRM from Hubspot to Zoho. The implementation consisted of eight custom modules, two journey builders, a dozen Deluge Script functions, numerous workflows, and several page layouts.

Salesforce Admin YouTube Series - Automate This - Guest Presenter (December 2024)

Presented innovative use cases for automating Salesforce certification study routines using Flows, email-to-text gateways, and Agentforce. Demonstrated expertise in creating efficient, user-focused solutions and successfully incorporating generative AI into a subscription management system.

CORE SKILLS

Salesforce-Specific Skills

App Builder • AppExchange • Building Custom Objects & Fields • Case Management • Data Loader • Experience Cloud • Flow Builder • Platform Configuration • Process Automation • Reports & Dashboards • Salesforce Configuration • Salesforce Inspector • Salesforce Optimization and Integration • Service Cloud • SOQL • Troubleshooting • User Adoption • User Management

Technical Skills

Agile Methodologies • Canva • Confluence • Data Analytics • Data Management • DevOps • Email Management • Functionality Testing • Gathering Requirements • HTML/CSS/JSON (Beginner) • Import Wizard • JIRA • Managing Tickets • NetSuite • SaaS Solutions • SDLC • ServiceNow • Technical Architecture & Strategic Planning • Workbench

Soft Skills

Adaptability • Attention to Detail • Business Analysis • Client Consultation • Communication Skills • Consulting Mindset • Critical Thinking • Prioritize Effectively • Presentation Delivery • Requirements Gathering • Time Management • User Stories • UX (User Experience) Design • Verbal Communication • Written Communication
